JANILDO CALUÊTE DE FARIAS JÚNIOR

Full Stack Developer | Angular, TypeScript, Java and Spring Boot

Recife, PE, Brazil | (81) 98611-0502 | jjcalluete@gmail.com | linkedin.com/in/janildocfariasjunior | github.com/EuJotaj | Portfolio: portfoliojotaj.vercel.app

PROFESSIONAL SUMMARY

Developer with professional experience in JavaScript and jQuery and full stack practice in projects with Angular, Java, Spring Boot and MySQL. Contributed to the evolution of more than 40 modules of a B2B ERP, with REST integrations and document generation. I build applications that connect interfaces, APIs and data persistence. Information Systems undergraduate student, with complementary knowledge in Python and AWS training in progress.

TECHNICAL SKILLS

- **Front-end:** Angular, React, TypeScript, JavaScript, HTML5, CSS3, jQuery, Tailwind CSS and Bootstrap.
- **Back-end and data in projects:** Java, Spring Boot, Spring Security, Spring Data JPA, MySQL, REST APIs, JSON and JWT. Complementary: Python and Flask.
- **Tools and cloud:** Git, GitHub, Maven and Vite. Amazon Web Services (AWS), training in progress.
- **Currently learning:** AWS, Java and Tailwind CSS.

PROFESSIONAL EXPERIENCE

Intern – MAKER Support 09/2026 – Present
City Hall of Paulista *Paulista, PE*

- Supported the development of educational software, programming activities and testing at the Management of Expanded Learning Spaces.
- Provided technical support to users, equipment maintenance and configuration, and support for network infrastructure and cabling.

Front-End Developer 07/2025 – 06/2026
Ômega Comércio Exterior & Logística *Recife, PE*

- Contributed to the development and evolution of more than 40 modules of a B2B ERP, covering financial, legal and controlling processes.
- Built interfaces and dashboards with JavaScript and jQuery, and reusable components to standardize the modules.
- Integrated interfaces with REST APIs and JSON data, and developed commercial proposal, billing and XML and PDF document generation workflows.

PROJECTS

FinControl – Financial management 2026
Angular, TypeScript, Java, Spring Boot, Spring Security, Spring Data JPA and MySQL *Personal project*

- Built a financial management application with an Angular interface and a Spring Boot REST API for income, expenses, cards, invoices and workspaces.
- Implemented sign-up and login with JWT authentication and endpoint protection with Spring Security, plus relational persistence in MySQL.
- Integrated the front-end with the API using HttpClient, organizing the back-end into controllers, services and repositories.
- Code: https://github.com/EuJotaj/FinControl

Motion Studio – Visual website and animation editor 2026
React, TypeScript, Vite, Web Animations API and IndexedDB *Personal project*

- Built an editor with editable layers, keyframes and animation preview, local persistence, JSON/ZIP export and React Bits components.
- Demo: https://motionstudiodesign.vercel.app/

EDUCATION

Bachelor's in Information Systems In progress
UNINASSAU *Expected completion: 11/2028*

ADDITIONAL COURSES

- **Cloud Computing with AWS** – Projeto Start, Rede Cidadã | 08/2026 – 01/2027 (expected) | In progress
- **Full Front-End Development** – Udemy | Completed in 2025 | 51 hours
- **Java Bootcamp with Applied AI** – DIO
