PROFESSIONAL SUMMARY

Front-End Developer with a solid track record in developing scalable applications and complex systems for the Logistics and Foreign Trade sector. Specialist in the evolution and maintenance of SPA architectures utilizing the JavaScript ecosystem (React, Angular, and JQuery), with a history of delivering 40+ functional modules, including billing engines, tax document automation (XML/PDF), and controllership workflows. Expertise in Prompt Engineering and AI model integration to optimize development workflows and automate internal processes. Proficient in translating business rules into high-performance, responsive interfaces, leveraging a technical background in network infrastructure to ensure resilient, user-experience-oriented software solutions.

TECHNICAL SKILLS

Frontend & SPA: JavaScript (ES6+), React, Angular, TypeScript, JQuery, Componentization, State Management, Hooks, Services, and Dependency Injection;
Languages & Backend: Python (Automation & Scripting), JavaScript (Node.js), Advanced Programming Logic, and Systems Integration;
Databases & Data: MySQL (Modeling & Queries), JSON Manipulation, Data Structures, and RESTful API Integration;
AI & Prompt Engineering: Prompt Engineering (complex instruction modeling), LLM Integration into workflows, and Development Process Optimization;
Styling & UI/UX: HTML5, CSS3, SASS/LESS, Styled Components, Bootstrap, Tailwind CSS, Responsive Interfaces, and Mobile-First Design;
Infrastructure & Tools: Git/GitHub, Computer Networks, Systems Maintenance, Document Generation (XML/PDF), and Specialized Technical Support;

PROFESSIONAL EXPERIENCE

Ômega Comércio Exterior & Logística

Recife, PE

Front-End Developer

July 2025 – June 2026

- B2B ERP Development (Foreign Trade):** Strategic role in the development and maintenance of a complex ERP ecosystem, responsible for the architecture and implementation of 40+ functional modules tailored for aduana logistics, legal, and controllership sectors.
- Frontend Architecture & SPA:** Standardized dynamic interfaces utilizing Angular and React. Defined API consumption workflows via Services and Dependency Injection, ensuring strong typing, efficient Data Binding, and componentization of high-complexity management dashboards.
- Financial Module & Automation:** Interface engineering for cash flow and billing automation, linking commercial proposal approvals directly to automated tax document generation (CT-es) via XML file integration and dynamic PDF generation.
- Optimization & UX:** Translated complex business rules and operational logic into responsive interfaces using JQuery and modern JavaScript, focusing on loading performance and end-user usability.

Exército Brasileiro (Brazilian Army)

Olinda, PE

Communications Soldier (Technical Support & Networks)

2024 – 2025

- Network & Data Infrastructure:** Managed preventive and corrective maintenance of computer networks and tactical communication systems in mission-critical environments.
- Specialized Technical Support:** Acted on hardware and software layers to ensure high availability of critical communication equipment. Awarded an ****Honorary Mention**** for discipline, professionalism, and technical excellence.
