PROFESSIONAL SUMMARY

Front-End Developer with professional experience developing web applications using **JavaScript** and **jQuery**, along with hands-on experience with **React**, **Angular**, and **TypeScript** through independent projects and through independent projects and hands-on learning. Contributed to the development and evolution of more than 40 modules for an ERP focused on Foreign Trade and Logistics, including dashboards, **REST API** integrations, reusable components, and automated XML and PDF document generation. Experienced in translating complex business rules into responsive, intuitive, and performance-oriented interfaces. Additional knowledge of **Node.js**, **Python**, **MySQL**, **Git**, **UI/UX**, Prompt Engineering, and Generative AI applied to software development productivity.

PROFESSIONAL EXPERIENCE

Ômega Comércio Exterior & Logística

Recife, PE

July 2025 – June 2026

Front-End Developer

- Developed and evolved more than 40 modules for a B2B ERP focused on Foreign Trade and Logistics, supporting Finance, Legal, and Controllship operations.
- Developed SPA applications using JavaScript and jQuery, focusing on responsive interfaces and componentization.
- Developed dashboards and interfaces to support the system's operational and management workflows.
- Integrated applications with REST APIs using services, dependency injection, and JSON data manipulation.
- Implemented reusable components to standardize interfaces and facilitate module evolution.
- Developed workflows related to commercial proposals, billing, and XML and PDF document generation.
- Translated complex business rules into intuitive interfaces, considering usability, performance, and user experience.

Brazilian Army

Olinda, PE

2024 – 2025

Communications Soldier — Technical Support & Networking

- Performed preventive and corrective maintenance on computer networks, communication equipment, and computer systems.
- Diagnosed and resolved hardware, software, and connectivity incidents, contributing to business continuity.
- Provided technical support to users, including equipment installation, configuration, and maintenance.
- Worked in a high-responsibility environment, developing skills in problem-solving, discipline, organization, and teamwork.
- Received a Merit Award for performance, commitment, and excellence in carrying out assigned duties.
